PROFESSIONAL SUMMARY

Ambitious Computer Science Engineering student and aspiring Full Stack Web Developer with practical experience engineering responsive user interfaces, robust backend architectures, and structured software documentation. Proficient in optimizing web performance using modern frontend technologies paired with object-oriented backend systems. Proven leader with a strong track record of orchestrating cross-functional teams, managing corporate relations, and deploying systematic operational roadmaps within institutional environments.

TECHNICAL SKILLS

Frontend Development: HTML5, CSS3, JavaScript (ES6+), Bootstrap, Responsive Web Design

Backend & Languages: Java, Python, C, C++, Object-Oriented Programming (OOP)

Databases & Architecture: Database Management Systems (DBMS), Relational Databases, Web System Architecture

Core Software Engineering: Data Structures & Algorithms (DSA), Software Requirement Specifications (SRS), Data Flow Diagrams (DFD), Unified Modeling Language (UML)

Tools & Platforms: Git, GitHub, IntelliJ IDEA, Visual Studio Code, Linux Foundations

TECHNICAL PROJECTS

Swachha Nagar Nigam Challenge (SNNC) Web Platform | Group Project

- Architected and deployed a highly responsive full-stack web application focused on promoting community cleanliness and structural public workflows.
- Spearheaded the development of dynamic, modular mentor information components, improving interface load efficiency and cross-device accessibility parameters.
- Utilized industry-standard version control systems to collaborate with a multidisciplinary engineering team, ensuring clean code hygiene.
- Technology Stack:** HTML5, CSS3, Bootstrap, JavaScript, Git

Online Auction System | System Architecture Project

- Engineered comprehensive software blueprint specifications and data validation modeling schemas for an enterprise-level e-commerce auction system.
- Authored detailed Software Requirement Specifications (SRS) alongside multi-level Data Flow Diagrams (DFDs) to systematically eliminate architectural dependencies.
- Designed high-fidelity Unified Modeling Language (UML) structural assets, including sequence and use-case models, to guide agile development iterations for a 6-member engineering cohort.
- Core Concepts:** Agile SDLC, System Modeling, UML Architecture, Technical Documentation

BookMyShow Clone | Frontend Web Application

- Programmed an immersive, full-featured digital ticket reservation clone featuring intuitive state navigation, dynamic rendering, and seamless checkout simulation pathways.
- Integrated complex responsive UI layouts and backend logic pathways to mimic real-time user-concurrency handling during high-traffic booking intervals.
- Technology Stack:** HTML5, CSS3, JavaScript (ES6), Web Architecture Principles

LEADERSHIP & PROFESSIONAL EXPERIENCE

Corporate Relations Head | Entrepreneurship Cell (E-Cell), GCOE Kolhapur

- Spearheaded corporate sponsorship outreach, strategic ecosystem partnerships, and industry stakeholder engagement models to scale flagship entrepreneurship summits.
- Formulated and standardized comprehensive internal roadmaps, procedural operational blueprints, and detailed plans of action to seamlessly transition leadership to incoming junior core teams.

Executive Member | Computer Science and Engineering Students' Association (CSESA)

- Directed large-scale promotional campaign matrices and student coordination methodologies, drastically elevating campus engagement indices during annual tech symposiums.
- Coordinated cross-functional marketing efforts and tech outreach workshops to bridge the knowledge gap between academic syllabi and industrial developer trends.

Technical Volunteer | AARAMBH – National Level Engineering Event

- Managed ground-level logistics, crowd synchronization strategies, and real-time operational troubleshooting workflows for a premium nationwide tech festival.

ACHIEVEMENTS & DISTINCTIONS

- **Second Runner-Up:** National Entrepreneurship Challenge (NEC), IIT Bombay (Conducted across successive cycles, 2024 & 2025).
- **Second Runner-Up:** Regional Western Entrepreneurship Challenge (WEC), KITCOEK.
- **Leadership Commendation:** Formally recognized for distinguished service as Corporate Relations Head at E-Cell and Executive Board Member at CSESA.

PROFESSIONAL CERTIFICATIONS

- **Web Development Masterclass** – Udemy (*Specialization in fluid responsive grid design and modern DOM manipulation*)
- **Core Java & Database Management Systems (DBMS)** – Lokare Infotech (*Immersive focus on OOP design patterns and complex relational query writing*)
- **C & C++ Programming Professional Certification** – Disha Institute

EDUCATION

- **Bachelor of Technology (B.Tech), Computer Science & Engineering** | Government College of Engineering, Kolhapur | 2023 - 2027
- **Higher Secondary Certificate (XII)** | Shri Hanumantrao Chate School & Jr. College of Science | Percentage: 73.0% | 2021 - 2023
- **Secondary School Certificate (X)** | St. Anne's English Medium School | Percentage: 97.0% | 2021
